

PENGANA AXIOM INTERNATIONAL ETHICAL FUND

DESCRIPTION

The Pengana Axiom International Ethical Fund invests in companies that are dynamically growing and changing for the better, more rapidly than generally expected and where the positive changes are not yet reflected in expectations or valuation.

The Global Equity Strategy seeks dynamic growth by concentrating its investments in global developed markets, and may also invest in companies located in emerging markets.

The investment manager is Axiom Investors, a Connecticut-based global equity fund manager formed in 1998 with over US\$19billion in assets under Management.

GLOBAL EQUITY MARKETS MAINTAIN UPWARD TREND

COMMENTARY

- Falling inflation and expectations of lower interest rates later this year helped global equities perform strongly in January, with growth stocks doing particularly well; a weaker Australian dollar further boosted returns in AUD terms.
- The US economy remains strong, giving rise to hopes of a soft landing, while Europe is struggling and China faces significant economic challenges.
- The Portfolio returned 7.7% in January, while the benchmark returned 3.8%.

Global equity markets maintained the upward trend of the previous two months in January as inflation continued to moderate. This raised hopes that interest rates will start to fall in the first half of this year, helping growth stocks to outperform value. US economic activity remains robust, increasing investor expectations of a soft landing.

Inflation continues to slow around the world. In the US, the Core Personal Consumption Expenditure (PCE) Price Index, a metric closely watched by the Federal Reserve, (Fed), fell to 2.9% year-on-year in December from 3.2% in November. Increasing geo-political risk and superior US growth prospects pushed the US dollar 1.9% higher against a basket of its key trading partners' currencies in January.

Economic activity remains mixed. The US labour market and consumer remain resilient, with December retail sales accelerating to 5.6%, while they fell a further 0.8% in Europe where economic indicators are still consistent with contraction.

China's broader economy remains weak as it faces worsening deflation. Consumer spending is sluggish and the highly leveraged property sector remains a drag on economic growth, although the manufacturing sector continues to show signs of limited expansion.

The Fund retains its focus on dynamic growth stocks, where positive revisions to earnings per share (EPS) drive outperformance as global economic growth moderates. The Fund continues to overweight information technology, consumer discretionary and health care, while underweighting financials, energy and materials.

Strong stock performance in the information technology, consumer discretionary and health care sectors, the overweighting to information technology and the underweighting to materials contributed to relative returns. Slightly weaker stock performance in financials and the overweight position in consumer discretionary detracted modestly.

US-based semiconductor developer **Nvidia** was the strongest performing holding in January. This reflects robust AI server demand and the company's increased production of its graphics processing units (GPUs). Many of its customers expect to increase investing in GPUs, as they build out their AI capabilities. Axiom's research continues to indicate that demand for data centre GPUs is far outstripping supply.

US enterprise software company **ServiceNow** outperformed after reporting another strong quarter of subscription growth. It delivered initial 2024 earnings guidance, which appears to offer upside potential. Customers are willing to pay higher prices for superior products enhanced by generative AI, which should further drive earnings growth.

Taiwan-based advanced chip manufacturer **TSMC** outperformed after reporting fourth quarter earnings, which exceeded investor expectations. The company continues to benefit from increasing demand, driven by generative AI innovation and the recent rundown in PC and smartphone inventory levels.

US-based luggage manufacturer and retailer **Samsonite** underperformed in January upon weakness in the China travel market. Similarly, Hong Kong-based pan-Asia life insurer **AIA Group** also detracted from relative returns upon continued concerns that economic activity in China continues to slow.

Dutch technology group **ST Microelectronics** underperformed after reporting modestly disappointing December quarter earnings results as industrial-related customers continued to run down their inventory levels. Forward earnings guidance was also below market forecasts as the company now expects the rebound in the industrial end market to be delayed until the second half of this year.

The Fund increased its position in the Dutch supplier to manufacturers of advanced semiconductors **ASML** in January. This followed strong earnings results as new orders for its extreme ultraviolet lithography (EUV) photolithography machines came in well ahead of even the highest expectations. This implies that medium-term revenue and earnings forecasts might be too low.

The Fund significantly increased its position in Facebook-owner **Meta Platforms** ahead of it announcing its December quarter earnings results. Axiom's analysis of digital advertising spending over the quarter revealed it would be well ahead of consensus expectations. This proved accurate, with fourth quarter results and forward guidance exceeding market forecasts and Meta unexpectedly announced it would begin paying a quarterly dividend.

The Fund increased its holding in the US-based provider of corporate uniforms and related business services **Cintas**, after it published strong quarterly earnings results and forward guidance. Its idiosyncratic growth strategy continues to gain momentum.

The Fund reduced its position in US-based global technology group **Apple**. Demand for new iPhones remains weak and the market valuation now fully reflects Axiom's medium-term outlook on the company.

The position in **Eli Lilly** was reduced, as the Fund realised some of its recent strong outperformance. Axiom's expectations for the earnings growth which is being driven by the company's obesity drugs are now beginning to be reflected in the market valuation level.

The Fund also continued to significantly reduce the position in US-based global automotive and clean energy company **Tesla** ahead of its quarterly results. Recent reductions in selling prices and a multitude of negative auto industry data points highlighted slower global demand for electric vehicles.

The Fund established a new position in US-based **Netflix**, the dominant Subscription Video on Demand (SVOD) streaming platform. The crackdown on password sharing across the globe is expected to drive near-term earnings growth. In the medium-to-long-term, its recently launched Advertising-based Video on Demand (AVOD) offering and ongoing pricing promotions are expected to grow revenue and earnings. After spending US\$17 billion on content in 2024, this amount is now expected to plateau, which should create the opportunity to grow profits as revenue continues to grow above 10% annually.

The Fund exited its position in US-based business advisory firm **FTI Consulting** in favour of investment opportunities which offer more attractive earnings growth. US macroeconomic data continues to be more robust than forecast, which leaves FTI's core restructuring consulting business a less attractive hedge against a slowing economy.

The investment team followed-up its prior engagement with **Meta Platforms**, which discussed environmental, social and governance (ESG) issues. The meeting discussed new social initiatives which the company is progressing that may not be fully understood by the market. It is incorporating social metrics into executive pay relating to internet privacy, safety and security and is also improving transparency.

The team also engaged with the US-based global cybersecurity company **Palo Alto**. The company does not plan to purchase any carbon offsets, credits or unbundled renewable energy certificates (RECs) to meet its carbon goals. It intends to move to using 100% renewable electricity and is already partnering with suppliers and customers to encourage them to ensure this happens across the entire value chain.

Prior to June 2021, the Axiom Global Equity Strategy performance (shown in the shaded area) includes the strategy performance simulated by Pengana from the monthly gross returns of the Axiom Global Equity strategy. This simulation was done by: 1) the conversion of US-denominated gross returns to AUD, 2) applying the fee structure of the stated class. The simulation does not include the Pengana ethical screen. From June 2021 the strategy performance is the performance of the Pengana Axiom International Ethical Fund.

1. Axiom was appointed fund manager as of 5 May 2021. June 2021 represents the first full month of Axiom managing the Fund.
2. Inception date 1 July 2017. Figures shown are calculated from the continuous performance of both the current and previous strategies. For performance see row labelled Fund: APIR (HOW0002AU) in the table above which is the continuous performance of both the current and previous strategies.
3. Axiom Global Equity Strategy inception 1 Jul 2004.
4. Prior to June 2021, the Axiom Global Equity Strategy performance (labeled 'Strategy (Partial Simulation)' and shown in the shaded area) includes the strategy performance simulated by Pengana from the monthly gross returns of the Axiom Global Equity strategy. This simulation was done by: 1) the conversion of US-denominated gross returns to AUD, 2) applying the fee structure of the stated class. The simulation does not include the Pengana ethical screen. From June 2021 the strategy performance is the performance of the Pengana Axiom International Ethical Fund.
5. MSCI All Country World Total Return Index in AUD.
6. Performance for periods greater than 12 months are annualised. Net performance figures are shown after all fees and expenses, and assume reinvestment of distributions. No allowance has been made for buy/sell spreads. Please refer to the PDS for information regarding risks. Past performance is not a reliable indicator of future performance, the value of investments can go up and down.
7. Annualised standard deviation since inception.
8. Relative to the MSCI All Country World Total Return Index in AUD.
